September 2013

Agenda

- What it is
- What it is not
- Little bit of history
- How to get it and work with it
- Q&A

What it is

- Ubuntu
- New Unity and UI framework (Qt/QML)
- New touch-oriented applications
- A converged experience
- Completely open source

What it is not

- An Android skin
- A desktop OS (yet)
- Hardware

A little bit of history++

- **2011 Sep:** First look at tablets
- **2011 Nov:** Focus switch to TV
- **2012 Apr:** Focus on Touch
- **2013 Jan:** Ubuntu Phone on CES
- **2013 May:** Ubuntu Tablet on MWC
- **2013 Oct:** Version 1.0

How to get it and work with it

Just download it

- We develop for 4 Nexus devices
- There's a lot of community ports for other devices

Available in Ubuntu

- The QtCreator-based SDK is available in Ubuntu
- All the software that's there on Ubuntu Touch is there in Ubuntu itself
- And on Launchpad

Supported frameworks

- Qt/QML (Qt 5.0)
- HTML5 (QtWebKit)
- PhoneGap

App distribution

- Click packages
- Ubuntu store already accepting apps
